

Name: **Nuly Hassan**

Position: Case Manager

Qualifications: Degree Occupational Therapy BSc (Hons)
AMP's Assessor 2014

Memberships: BABICM 8511
HCPC OT67722

I have over 10 years' experience in the NHS and private field, developing a broad skillset working as an Occupational Therapist specialising in intervention for adults acquired/traumatic brain injury, and progressive or acute conditions. I proficiently oversee and manage complex care teams, multidisciplinary teams, I can implement and lead rehabilitation and independent living trials.

I pride myself in the ability to provide a friendly, flexible, client-centred approach; with a focus on supporting clients to achieve their goals and maximise their independence. I believe in collaborative working with all parties in the client's life and clinical teams, to ensure the best results for the clients I work with.

Throughout my career, I have worked effectively as part of a multidisciplinary team approach, and have developed excellent working relationships resulting in personal recommendations for new referrals. I enjoy working with other professionals in a liaison role to ensure, as a team, the client is empowered to live their best life.

I have adopted a down-to-earth, friendly, open and transparent, can-do approach with my clients and their support network in the journey ahead, and believe it is important to build good rapport and trust with my clients. This enables a positive, outcome focused methodology to my Case Management work, which ensures that bespoke client lead goal planning is always completed with the client at the heart of my work.

Nuly's Specialist areas/skills include:

- Team Lead inpatient rehabilitation.
- Stroke / ABI rehabilitation
- Discharge planning, assessment and home transfer
- Independent living trials
- Managing complex health and social needs, within a family and residential setting
- Knowledge of NHS discharge process and accessing statutory services
- Assessment of ongoing clinical needs and treatment plans
- Completion of initial needs assessments, budgets and reports
- Excellent working relationship and understanding of Continuing Health Care, Personal Health Care Budget, Adult Social Care, and Joint Community Rehabilitation Services.
