

Name	Emma Quigley
Position	Physiotherapist
Qualifications	BSC Hons Physiotherapy
Memberships	HPCP: PH78122 CSP: 082901 ACPIN

As a dedicated neuro physiotherapist with over 16 years experience, my mission is to enhance the quality of life and functional independence of individuals with neurological conditions.

I currently work as a Senior Specialist Physiotherapist and Team Leader in a complex rehabilitation unit. As part of an integrated organisation I share skills with my acute and community colleagues, ensuring that patients get the best from their treatment at all stages of their journey. I enjoy empowering others such as Healthcare Assistants, Rehab Support Workers, students, family members and care givers with knowledge. Enhancing the knowledge of others works towards the common goal of personalised care for clients, and improved health and wellbeing outcomes for clients, families and staff.

I specialise in therapeutic treatment and handling, gait assessments and re-education, the use of electrical stimulation, postural assessments, and seating and wheelchair assessments. I have a special interest in tonal assessment and management as well as splinting and orthotics.

I am committed to providing evidence-based, personalised treatment plans that address the unique needs of each individual. By fostering a supportive and compassionate environment, I strive to empower clients and their families on their rehabilitation journey, helping them achieve optimal mobility, comfort, and confidence in their daily lives.

Specialist areas/skills include:

- Rehabilitation for neurological conditions.
- Goal Orientated Exercise Programmes.
- Neuromuscular Electrical Stimulation.
- Gait Analysis and Re-education.
- Use of splints and orthotics.
- Postural assessments for bed/chair/wheelchair.
- Tone assessments and liaison with GP regarding management strategies.
- Communication with others to co-ordinate care.
